## **COMPOSTABLE:**

All natural and organic products or materials that are biodegradable with the help of air, moisture and natural organisms.

## **ENVIRONMENTALLY PREFERABLE:**

Another way of saying environmentally friendly, sustainable or ecologically responsible. Some environmental certification programs use this terminology to describe green products or appliances.

## **GREEN:**

Refers to products, equipment, practices and concepts that promote environmental sustainability.

## **PLA:**

Processed corn starch called poly-lactic acid, used to form biodegradable cups and carry-out containers.

## **POLYSTYRENE:**

Pure solid polystyrene is a colorless, hard plastic with limited flexibility. It can be cast into molds with fine detail. Polystyrene can be transparent or can be made to take on colors. Expanded polystyrene (EPS), is commonly known by the trade name styrofoam.

## **POST CONSUMER RECYCLED CONTENT:**

Waste content that has been used in the consumer market and then recycled into new products.
